

potentiometric determination of ketotifen fumarate in - this study compares between unmodified carbon paste cpe the paste has no ion pair and polyvinyl chloride pvc membrane selective electrodes that were used in potentiometric determination of ketotifen fumarate ktf where sodium tetraphenylborate, **alain pailleret upmc sorbonne universit s academia edu** - abstract surface activation of polymers by atmospheric pressure plasma is an economically important process for bonding technologies although most of the studies are focused on the modification of the surface chemistry this study investigates the modification of the topmost surface and the deeper layers of a polyamide 6 sheet treated by an open air atmospheric plasma jet system, **simultaneous determination of dopamine in presence of** - a novel electro chemical method was designed to develop a simple inexpensive selective and sensitive electrochemical sensor by modifying carbon paste electrode for the simultaneous determination of dopamine da without the interference of ascorbic, **analytical methods in food additives determination** - according to the industrial use the food additives are classified into 25 classes which include about 230 different compounds some compounds present more than one principal action due to their different functionalities which are dependent on the added quantities and processing mode of the food, **curriculum vitae academia edu** - academia edu is a place to share and follow research, **a fully protected hydrogenase polymer based bioanode for** - this enzyme cascade removes not only oxygen but also harmful h₂ o₂ eq that might be produced by an incomplete reduction of o₂ at the low potential viologen mediator recently we have shown, **a review on detection of heavy metal ions in water an** - 1 introduction heavy metals are considered as low density chemical components those are highly toxic also they are defined as metals with atomic weights between 63.5 and 200.6 g mol⁻¹ and a specific gravity greater than 5 g cm⁻³ these heavy metals are non biodegradable ubiquitously distributed and lead to a greater risk to human health and environment, **nanoporous gold supported cobalt oxide microelectrodes as** - tremendous demands for electrochemical biosensors with high sensitivity and reliability fast response and excellent selectivity have stimulated intensive research on developing versatile, **ris toyo ac jp** - multifunctional biocompatible fluorescent carboxymethyl cellulose nanoparticles ravindran girija aswathy balasubramanian sivakumar dhandayudhapani brahatheswaran sreejith raveendran tomofumi ukai takahiro fukuda yasuhiko yoshida toru maekawa dasappan nair sakthikumar journal of biomaterials and nanobiotechnology 3 254 261 2012 02, **dod 2017 1 sbir solicitation sbir gov** - technology area s air platform objective develop and demonstrate lightweight durable high power density electric motor technologies for main auxiliary propulsors to enable future turbo generators to power dod group 2 small group 3 unmanned aerial systems uass for increased reliability and operational capability
